

# Networking at Fikile’s print and copy

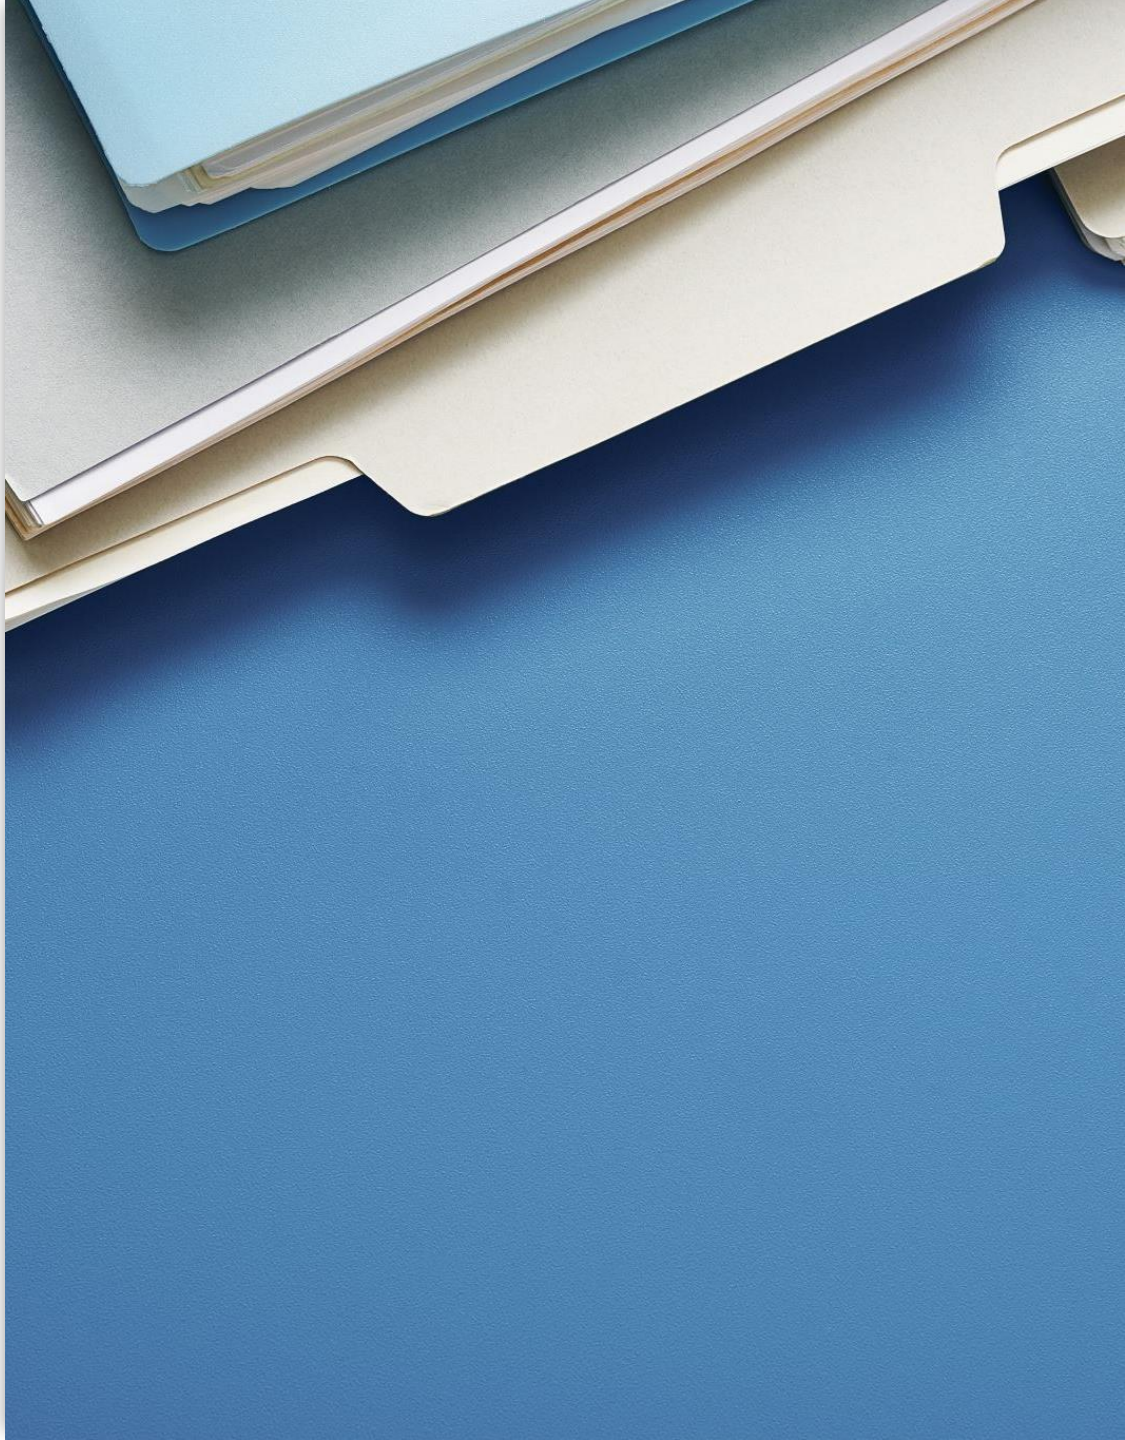

Fikile Mkhize

# AGENDA

- USES OF LAN IN THE ORGANISATION
- MAIN TYPES OF LAN MEDIA USED
- LAN CONFIGURATON AVAILABLE
- BENEFITS OF WAN TO THE ORGANISATION

# Uses of LAN in Fikile's print and copy

- Shared printers and copiers- All PCs send print jobs to the main format printer, large format printer and copier without moving files with flash drives
- File sharing- Design files from the design PC and cashier PC, Logos, templates client artwork stored on one folder.
- POS(POINT OF SALE)+ Invoicing- Cashier PC connects to database to print receipts, quotes and track orders.
- Internet sharing- One internet line for customer Wi-fi, cloud printing and downloading design assets.
- Backup- Daily backup of client files to a central PC\server so nothing gets lost.

# Main types of LAN media used

Twisted pair-Cat6 cable connects design PCs, Cashier PC and printer to the switch. Reliable for big print files.

Wireless Wi-Fi for customer area+ my laptop/ tablet. Used for cloud printing and taking orders on the floor.

Why not Fiber ?- Too expensive for a small shop. Cat6 is enough for LAN speeds.

**Lan configurations at Fikile's**

Star topology- All PCs and printers connect to one central switch/router. If one PC fails, others still work.

Client- Server setup- Server PC stores all client files , price lists, templates.

Client: Design PC, Printing PC, Cashier PC access the server.

Peer-to-peer – Sometimes the design PC shares directly with the printing PC for urgent jobs.

**Benefits of WAN for Fikile's print and copy**

Even if I only have one shop now, WAN becomes useful if I decide to expand.

Multiple branches: Will connect a second Fikile's print and copy in another area to the same system.

Remote access: I can check orders and sales from home.

Cloud service: Use WAN to backup to Google Drive/One Drive and to send large files to commercial printers.

Supplier connection : Order stock/ink online and to get updates directly.

Customer service: Email proofs to clients and get approval faster.

LAN keeps daily printing fast and organized. WAN will help Fikile's grow more branches.

Thank you. Are there any questions?
