APPLY PROBLEM SOLVING STRATEGIES

US 14927

SECTION A:FORMATIVE ASSESSMENT

QUESTION 1

1. Identify and define the problem-gather information from the user
2. Gather information-Collect facts, error messages, and ask questions to understand causes.
3. Analyze the problem- Break the problem down, Determine if it's hardware, software, network or user error.
4. Identify possible causes- List all possible reasons the problem could be happening.
5. Prioritize causes- Decide which causes are most likely based on evidence
6. Document findings- keep a record of what you found and what you've tested for.

QUESTION 2

1.Trial and error l- test different possible solutions until the problem is solved

2. Divide and conquer- break a big problem into smaller parts. Test each part to find where the fault is

3. Root cause analysis- Ask "why" repeatedly to find the real underlying cause so it does not happen again.

QUESTION 3

1. Cost-Find out if the solution is affordable
2. Time- how long will it take to implement
3. Resource implications- some solutions require resources which can result in higher cost I'd implementation.
4. Stakeholder commitment- each solution must be assessed in terms of the willingness of Stakeholders to support the solution.
5. Feasibility- viability is based on availability of resources, expertise, finances and capacity of the organization to implement solutions.
