COMPLY WITH SERVICE LEVELS AS SET OUT IN A COMTACT CENTRE OPERATION

US 10313

SECTION A: FORMATIVE ASSESSMENT

QUESTION 1

1. Answer Speed / Response Time: To ensure customers are not kept waiting too long.

Example: 80% of calls answered within 20 seconds.

2. Abandon Rate: to measure how many customers hang up before being served. Helps manage frustration.

Example: Keep abandon rate below 5%

3. First Contact Resolution (FCR)

Purpose: To resolve customer issues on the first interaction, improving satisfaction and reducing costs.

Example: 75% of queries resolved without a callback.

4. Service Level Agreement (SLA) Compliance : To meet agreed contractual targets with clients.

Example: All emails responded to within 24 hours.

5. Occupancy Rate: To ensure agents are productive but not overloaded.

Example: Agents should be on calls/admin 85% of their shift.

QUESTION 2

I. Shift changes :should be implemented so that fresh personnel take over to avoid fatigue

II. Management: it should Identify the responsible personnel who will manage the project until completion.

III. Information systems: Service level requirements spells out how technical support will be provided for the service

IV. Sign on time: Separate dates foe pilot service and full production service should be provided.

Fikile Mkhize

V. Abandonment rate: an acceptable Abandonment rate target must be included.

QUESTION 3

1. Define service levels in line with business and client requirements.
2. Communicate the targets to all staff so everyone understands expectations.
3. Workforce planning: Forecast call volumes and create rosters.
4. Provide training to agents on systems, products, and soft skills
5. Install monitoring tools like ACD reports, dashboards, and QA systems.
6. Set up feedback loops to review performance weekly/monthly.
7. Align incentives to reward meeting service levels.

8. Pilot and adjust before full rollout to fix gaps.

QUESTION 4

1. Real-time dashboards - track calls answered, wait times live.
2. Quality assurance monitoring - call listening and scoring.
3. Reports and analytics - daily/weekly SLA reports.
4. Customer surveys / CSAT- to check if service level translates to satisfaction.
5. Workforce management software- to track adherence and occupancy.
6. Team huddles - review yesterday's results and gaps.

QUESTION 5

1. Root cause analysis - Is it staffing, training, system downtime, or unrealistic targets?
2. Revise workforce plan- Adjust schedules or hire more agents.
3. Retrain staff - Address skill gaps affecting speed/quality.
4. Escalate system issues to IT if tech is the problem.
5. Review and renegotiate SLAs if targets are not achievable.

6. Implement action plans with timelines and monitor progress.

QUESTION 6

1. Agents absenteeism : the annual absence rate in contact centres across the globe is 11%
2. Staff attrition: High staff turnover can negatively impact contact centre quality because every time a trained agents leaves, fewer are on hand to ensure an optimum level of service.

Fikile Mkhize

3. Agent engagement: agents work exclusively monotonous due to highly repetitive nature of the job.
4. Unrealistic service levels: companies set targets to what is desirable rather than realistically achievable or set targets too low to achieve business goals.
5. Improper setup and inflator support service levels: the working conditions must be a place where agents can be able to work in.
6. Misused penalties and incentives: performance penalties and reward can be a powerful tool if used correctly
