
Alert! Front I/O Cable failure.
Attention: Unsupported Video Configuration Detected
Action is Required
This computer has an add-in graphics card, but the monitor cable is plugged into the integrated video connector.
To attach the monitor cable to the add-in graphics card:
1. Shut down the computer
2. Plug the monitor cable into the add-in graphics card connector.
This may require a video adapter or video adapter cable.
(provided with the system)
3. Turn on the computer.
This message should not appear after completing these steps.
For more information or help, please refer to the system documentation.
Alert! Keyboard not found.
System Halted!
